Sat, 06 Oct 2018 14:36:00 GMT - Introduction and Summary The parts of the plant are divided into two basic sections, the root and the shoot. The root is comprised of all the structures below the soil, and the shoot is composed of the structures above. Included in the shoot of seed plants are the stem, the leaves, and the seeds.

SparkNotes: Plant Structures: Introduction and Summary -

Thu, 11 Oct 2018 14:09:00 GMT - Plants have cell walls made of cellulose. During cell division plant cells build dividing walls between the two new cells called the cell plate. An adhesive layer - the middle lamella - is laid down between the new cell walls Cell walls can be thickened through the addition of materials to the inside of the primary cell wall.

Sun, 14 Oct 2018 01:19:00 GMT - The Secret Life of Plants is a book by Peter Tompkins and Christopher Bird. The book documents controversial experiments that claim to reveal unusual phenomena regarding plants such as plant sentience, discovered through experimentation. It goes on to discuss philosophies and progressive farming methods based on these findings. The book was heavily criticized by scientists for promoting pseudoscientific claims.

The Secret Life of Plants - Wikipedia -

- Alex resolves to do whatever it takes to save the manufacturing plant. Meanwhile his wife, Julie, struggles to adjust to the monotonous life in the small town. Alex's long hours at office put additional strain on their relationship, as things go from bad to worse.
